YERISWAMY DV

PRODUCT SUSTAINING ENGINEER | MEDICAL DEVICES & ORTHOPAEDICS | TEAM LEAD

Karnataka, India | +91 7022556720 | **yerriswamydys18@gmail.com** | **linkedin.com/in/yeriswamy-dv-b40993158** | **yeriswamydv.github.io**

Mobility & Work Authorization: Indian citizen • Open to roles across India • Open to employer-sponsored relocation across **Europe & the UK**, and **Australia & New Zealand (ANZ)**.

PROFESSIONAL SUMMARY

Product Sustaining Engineer with **6+ years of specialised experience** delivering patient-specific orthopaedic solutions, joint reconstruction systems, and surgical instrumentation. Proven track record managing Design Controls, engineering change governance (ECN/ECO/DCR), and quality investigations within **FDA 21 CFR Part 820** and **ISO 13485:2016** regulated environments, while leading an engineering team of 16 members. Demonstrated results resolving **571 sustaining tickets**, authoring **4 DCR releases**, closing CAPA investigations, handling NCRs and process deviations, and automating drafting checks via custom SolidWorks macros. Keen to apply core FDA and ISO 13485 expertise under **EU MDR**, **TGA & Medsafe**, and **CDSCO** / **Medical Device Rules**.

KEY ACCOMPLISHMENTS

- **Team Leadership & Technical Delivery:** Lead and mentor a 16-member medical engineering team across design revisions, quality checks, and technical documentation.
- **Sustaining Execution:** Successfully closed **571 engineering sustaining tickets** and executed **4 Design Change Requests (DCRs)** across active implant lines.
- **CAPA & Quality Resolution:** Steered 1 complex CAPA investigation to verified closure, supported site NCR resolutions, and handled formal process deviations.
- **Automation & Productivity:** Developed a custom **Review Macro** in SolidWorks that automated drawing checks, substantially improving inspection accuracy and turnaround time.
- **Industry Recognition:** Awarded the *restor3d Certificate of Recognition (2024)* for outstanding engineering performance, service, and dedication.

PROFESSIONAL EXPERIENCE

Product Sustaining Engineer – Conformis India LLP (acquired by restor3d) — Feb 2024 – Present

- Lead and mentor an engineering team of 16 members, directing daily task allocation, technical guidance, drawing quality checks, and on-time engineering deliverables.
- Manage engineering change lifecycle; authored, reviewed, and successfully executed **4 Design Change Requests (DCRs)** and **571 engineering sustaining tickets** across patient-specific knee and hip implant systems.
- Investigate and resolve quality issues under FDA 21 CFR Part 820 and ISO 13485:2016; successfully led **1 CAPA investigation to verified closure**, resolved site Non-Conformance Reports (NCRs), and handled documented process deviations.
- Develop and maintain Design History File (DHF) technical documentation, Device Master Records (DMR), and Standard Operating Procedures (SOPs)/Work Instructions (WIs) in compliance with design controls.
- Developed a customized **Review Macro** in SolidWorks to automate drawing verification checks, improving model validation speed and significantly reducing human inspection errors.
- Execute CAD design modifications for implants, instrumentation, and cutting guides using SolidWorks, Siemens NX, and Creo, ensuring precision geometric dimensioning and tolerancing (GD&T).
- Awarded the *restor3d Certificate of Recognition (2024)* for outstanding engineering performance, service, and dedication to product sustaining quality.

Team Lead – Product Design & Quality – Conformis India LLP — Apr 2022 – Jan 2024

- Led a 12-member engineering team delivering CT-scan anatomical bone segmentation and patient-matched CAD implant models, maintaining consistent throughput and quality thresholds.
- Conducted thorough quality audits and technical reviews on anatomical segmentation boundaries, resection planes, and prosthetic sizing.
- Coordinated cross-functional engineering review meetings with US-based product development and quality counterparts.

Team Member – Product Design & Quality – Conformis India LLP — Aug 2021 – Mar 2022

- Executed patient-specific 3D anatomical modeling from clinical DICOM/CT datasets using advanced segmentation workflows and SolidWorks.
- Performed dimensional verification, drawing checks, and quality inspections against documented clinical specifications.

Career Break – Family Caregiver — Aug 2019 – Aug 2021

Career break taken to provide dedicated personal care for parents; proactively returned to the medical device industry in August 2021.

CAD Engineer – nFolks Data Solutions (deployed at Larsen & Toubro Technology Services) — Jul 2018 – Aug 2019

- Designed precision manufacturing jigs, inspection fixtures, and tooling assemblies for orthopedic medical devices using SolidWorks, Siemens NX, Creo, and Autodesk Inventor.
- Generated detailed 2D manufacturing drawings and engineering documentation adhering to ASME Y14.5 / ISO 1101 GD&T standards.
- Collaborated with cross-functional engineering teams to support prototype manufacturing trials and tooling feasibility studies.

CAD Trainee (Internship) – Rane Madras Pvt. Ltd **Jul 2017 – Jul 2018**

- Assisted in designing and manufacturing precision jigs and inspection fixtures for steering gear components.
- Created 2D/3D CAD models in SolidWorks and AutoCAD; conducted dimensional inspection using Vernier calipers, micrometres, height gauges, and profile projectors.

KEY PROJECT

Porous CR Femoral & Tibial Implant Development **Conformis / restor3d**

Contributed to CAD design modeling and design control documentation for the porous cementless variant of the knee implant platform.

Supported implementation of design guide criteria across femoral and tibial components, modular trays, and surgical guides in SolidWorks under ISO 13485 and FDA 21 CFR Part 820 design controls.

EDUCATION & TECHNICAL QUALIFICATIONS

Diploma in Tool and Die Making (4-Year Intensive Technical Engineering Program) **Jul 2014 – Jun 2018**

Government Tool Room and Training Centre (GT&TC), Hospet, Karnataka

Rigorous 4-year technical curriculum focusing on precision mechanical tooling design, advanced CAD/CAM, CNC programming, GD&T, engineering metallurgy, and quality inspection metrology.

✓ **Professional Equivalence: Backed by 6+ years of specialized corporate medical device engineering under US FDA 21 CFR Part 820 and ISO 13485 frameworks, satisfying practical engineering requirements for Senior Design Engineer and Lead roles across Indian R&D centers, European enterprises, and the Engineers Australia / Engineering New Zealand CDR framework.**

CERTIFICATIONS & TRAINING

- **Master Medical Devices Regulatory Affairs** – (In Progress)
- **ISO 13485:2016:** Medical Device Quality Management Systems – Udemy
- **ISO 14971:** Risk Management for Medical Devices – (In Progress)
- **Quality Management** – Great Learning
- **Project Management** – Simplilearn (SkillUP)

TECHNICAL PROFICIENCIES

CAD & Design Software	SolidWorks, Siemens NX (UG NX), Creo (Pro-E), Autodesk Inventor, AutoCAD, Autodesk Revit, SolidWorks API (Review Macro)
Medical Device Engineering	Design Controls, Product Sustaining Engineering, Change Management (ECN/ECO/DCR), CAPA, NCR Investigations, Process Deviations, DHF Documentation, DMR
Quality & Regulatory Systems	FDA 21 CFR Part 820 (QMSR), ISO 13485:2016, ISO 14971 (Risk Management), Root Cause Analysis
Manufacturing & Tooling	Orthopedic Implant Design, Jigs & Fixtures Design, Tool & Die Making, GD&T (ASME Y14.5 / ISO 1101), CT Segmentation Workflows
Languages	English (Professional Working Proficiency), Kannada, Telugu, Hindi
